Our Company History

The story of TAWZ Engineering Services Ltd started in 2012 when a group of four civil engineering students from Makerere University saw a gap in the construction industry for quality consultancy and contractor services. There was a need for more pragmatic, service focused providers who were willing to partner and grow with businesses and take on a role of a trusted Engineering consultant and contractor. Most importantly, they believed that with the skills input of a contractor, the consultancy services can be made more lively, practical and efficient to avoid/ reduce the common problems of re-designing and variations due to unforeseen construction constraints and many other related consequences which tend to be expensive in the long run. In an attempt to curb the identified deficiencies, TAWZ Engineering services Ltd. was conceived, and born a while later.

COMPANY DETAILS

Organization structure

Our mission, vision, values & Goals

Our mission

We exist, “To help our clients achieve their dreams in the most efficient and economical way with the assurance of quality.”

Our Vision

To be the leading engineering contractor and consultancy service provider in the eastern African region.

Core Values

- Integrity
- Efficiency
- Economy

Our Goal

We aim “To be the Leading engineering company that provides

both contractor and consultancy services in the Eastern African Region by 2050”

What We Do

We are engineering contractors and consultants. Our services include:

Contractor services;

- Building construction
- Roads and bridges
- Infrastructure maintenance
- Traffic analysis
- Land surveying
- Quantity surveying
- Electrical installations

Consultancy services;

- Project planning and management
- Structural analysis and design
- Highway design
- Traffic impact studies

- Design of intersections
- Plumbing and Drainage
- Geotechnical investigations

Therefore...

We Build:

Custom homes from the ground up, Architectural projects drawn by your architect, engineer or designer, Custom additions, Kit houses by Deck House and Noble Homes, Cabins, cottages, tiny houses and other small, custom structures; Off grid and other alternative applications.

We Design:

Our Design Team Will; Plan your project face-to-face, Conduct analysis of project needs, Local

zoning and code requirements observation, Analysis of financials, Sketches or drawings of project,

Procurement of materials, and construct your project too or delegate to your preferred contractor. We also **design and build**.

We fix:

We repair, renovate, maintain, and even rehabilitate infrastructures

for efficient and effective service life recovery.

Why Choose Us?

We value your interests

The interests of the customers comes first, then we may advice as we deem necessary. We can only advice, but the decision is made by you. We will therefore not carry out any works outside the contractual agreements.

We have the experience for the works

We have qualified professionals academically and experience-wise. Young as the company may appear to be, we have worked with several other engineering companies on several projects, even long before the incorporation of our company.

We are always improving

We use the best of the latest tools and technology available at the time of project execution to ensure that the projects are delivered on time, while paying attention to details, ensuring that everything is done according to the project drawings and specifications.

We deal with integrity

Honesty and integrity comes first in all our transactions. We labour to ensure that everything is done in line with statutory regulations and engineering working ethics

Our Clients

At TAWZ Engineering Services Ltd we service many businesses from a variety of industries and individuals. Our clients include;

- Local governments
- Private investors interested in construction services
- Government parastatals responsible for infrastructure development, e.g. UNRA, KCCA, MoWT (in Uganda) and many others in various nations.
- Non-Governmental organisations (NGOs) with infrastructures to develop.
- Private individuals with construction services needs such as residential buildings, commercial structures, etc.

Finance

We hold an account with Equity bank, Uganda, and we have a very good relationship with our financial institution.

We have the capacity to mobilize financing of up to Ugx. 100M.

Work capacity

We have the capacity to execute works of project costs ranging from Ugx. 1m to Ugx. 50bn
